- Remote management:
 - Allows users to access, configure, and manage the PDU from remote locations via SSL web (https) and SNMP control. Reduce system down-time and simply reboot from a remote location with a simple switch of one individual power socket. The possibility of switching individual sockets finally makes remote control a reality. Your switch is my command!
- Magic of metering:
 - True RMS Current Metering & Reporting. Prevents overloaded circuits and allows allocating energy costs to specific devices. Monitor energy usage of each socket via the LED display, or from any remote location with the network management capabilities of the PDU.
- Real time alarm system:
 - Real time sensing of user defined alarm thresholds helps avoiding overloaded circuits. The PDU informs users about alarm situations via e-mail, SNMP, SysLog and visible (LED) and audible alarm signals.
- Protect you equipment:
 - Advanced circuit breaker protection helps protecting your valuable equipment.
